// PROFILE

Cybersecurity-driven IT leader combining OSINT expertise, social engineering, and technical project management to strengthen organizational security. Specialized in designing custom, low-cost solutions as alternatives to expensive commercial tools. Experienced in full-stack system architecture, incident response, phishing simulation, and CTF design. Leverages AI-assisted workflows to accelerate development and deployment cycles.

// EXPERIENCE

Vice President — IT Supervisor & Head of HR · ECDH Association

Sep 2025 – Present

- Directed IT and HR departments, aligning digital infrastructure with organizational strategy.
- Architected and deployed the ECDH HR System: a multi-layer Google Apps Script + Hostinger solution managing the full member lifecycle with real-time sync, QR identity, and automated notifications.
- Produced monthly data-driven dashboards and reports for leadership decision-making.
- Applied OSINT-based vetting framework to headhunting operations, significantly improving recruitment quality.

Vice President — Head of IT Department · ECDH Association

Oct 2024 – Sep 2025

- Led IT team delivering digital tools, secure data systems, and event platforms.
- Designed, deployed, and maintained WordPress platforms (Hostinger, Elementor Pro, PHP/JS) enabling secure ticketing and event operations.
- Conducted continuous security monitoring: vulnerability scans, log reviews, and mitigation workflows.
- Led IT operations for VH, SDO, and NCC events — delivering websites and on-site technical support.

Head of IT Department · ECDH Association

Feb 2024 – Oct 2024

- Supervised IT operations, ensured system reliability, and strengthened confidential databases.

Member — IT Department · ECDH Association

Aug 2023 – Feb 2024

- Contributed to platform operations, security improvement, and team digital workflows.

// PROJECTS

HostLog v3.0.0

`PHP · Python · Security`

Threat detection & security dashboard for constrained hosting environments (no terminal access)

- PHP-based request logger injected via auto_prepend_file with Cloudflare & proxy-aware IP detection.
- Python-based local analyzer with 13 threat detection rules across HIGH / MEDIUM / LOW severity.
- Browser-based dashboard: live analysis, IP blocking, whitelist management, log control.
- Detects DoS patterns, brute force, shell probes, distributed scans, XML-RPC abuse, and more.
- Zero external dependencies; secure log storage outside public_html.

ECDH HR System

GAS · Sheets · Hostinger

Custom HR automation & verification system managing the full member lifecycle

- Centralized member management with automated status sync via event-driven Apps Script triggers.
- QR code generation for membership IDs and a public verification portal at verify.ecdh.ma.
- Cached data layer for fast lookup and reduced API calls; birthday and notification automation.
- Multi-file architecture: Config.gs, Code.gs, WebApp.gs, Triggers.gs, QRGenerator.gs.

North Coding Challenge — NCC 2025

CTF · Linux · Docker

Full-scale CTF competition designed and executed end-to-end for ~60 participants

- Architected a 20-level CTF (+ bonus hidden levels) on an isolated Linux environment with progressive challenges.
- Domains: reverse engineering, web exploitation, reconnaissance, cryptography, system & network.
- Official Docker image: wissamecdh/ncc-2025. Delivered full documentation and Discord-based support.

Internal Phishing Campaigns

SE · Awareness · Reporting

Simulated social engineering attacks to assess and improve organizational resilience

- Crafted realistic phishing scenarios using HTML/CSS/JS with SPF/DKIM/DMARC configurations.
- Tracked click rates, device/browser metadata, and multi-device access to simulate recon phases.
- Produced risk reports with exploited behaviors and corrective action plans; ran tailored training sessions.

Router Hardening & Security Audit

Network · Hardening

Structured audit and hardening project serving as a reusable methodology reference

- Performed network scanning, vulnerability identification, and configuration hardening.
- Produced structured security reports applicable as reference methodology for real environments.

// TECHNICAL SKILLS

Security	OSINT, Social Engineering, Phishing Simulation, Nmap, Wireshark, WPScan, Kali Linux, CTF
Systems	Windows, Linux (Debian), Docker, VirtualBox, Workflow Automation
Web/Infra	WordPress, Elementor Pro, Hostinger
Data	Google Sheets (advanced), Excel, Apps Script automation, Dashboard design

// EDUCATION

English Literature
Faculté des Lettres, Tétouan — 2023–Present

Preparatory Cycle (Sciences)
ENSA Tétouan — 2021–2023

Bac Libre (SPC) — Highest Honors
2021

Bac (SPC/BIOF) — High Honors
2020
